I have a Stay-Rite Max-E-Therm 400HD. I have been replacing parts as it would run for a while and then quit. Today I removed the HSI to replace and noticed half the tip of the HSI was submerged in WATER!! So where do I go from here?? Do I disassemble the manifold and replace o-ring seals or check for a cracked manifold? Heater is around 2-4 yrs old and I wouldn't expect a hole in the heat ...

The burners on this type of MasterTemp/Max-e-Therm heater are quite unique from previous generation pool heaters. Older style heaters use a low horizontal manifold supplying dozens of individual burners across the bottom of the burner tray, shown at left. The Burner System of the MasterTemp/Max-e-Therm heaters is one single burner, called the Flame Holder, shown right. The burner is located in ...
